DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-70 and 79-101, drawn to a method of manufacturing an electron beam device, classified in class 445, subclass 24.
- II. Claims 71-74, drawn to a method of manufacturing a plate type image forming apparatus, classified in class 445, subclass 3.
- III. Claims 75-78, drawn to a device for manufacturing a plate type image forming apparatus, classified in class 445, subclass 63.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II or III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects.

Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus or by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art (1) as shown by their different classification, and (2) because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2879

Furthermore, the claims directed to Invention I are further restricted for the following reasons.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1: Claims 1-21, 79 and 80 pertaining to Fig. 7A,

Species 2: Claims 22-26 pertaining to Fig. 24,

Species 3: Claims 27-29 and 56-62,

Species 4: Claims 30-41 pertaining to Fig. 46,

Species 5: Claims 42-55 pertaining to Fig. 62,

Species 6: Claims 63-70 pertaining to Figs. 83A-83B, and

Species 7: Claims 81-101 pertaining to Figs. 90A-90B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2879

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
